DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

A small log structure measuring approx 10' x 15'. This is one of the few log spring houses discovered by me in Carroll County. The walls are built of dovetailed squared logs with a mortar composition of rock and mortar. At both the N. + S. gables is a horizontal plank sheathing, that is to say from the eave level to the roof ridge. At the north wall is a door of vertical latten design. The roof is "A" plan with the ridge running N-S and is sheathed in tin.

Pleasingly situated in a grove of trees with a fresh spring running at the N end this total composition has an aesthetic quality that few other Carroll County farm buildings can match.
